CS491 - Fall 202 - Project Information Form

Please fill the form for your CS491 Design project.

It is sufficient for one team member from each team to fill out this form.

* Required

Email *

tugce.neziroglu@ug.bilkent.edu.tr

Name of the Project *

Aim for a short, unambiguous, and memorable title for your project/team. Your project name should reflect what makes your project unique.

RNAtlas

One paragraph description of the project *

You should write an high-level summary of your project. It must be very-well written and checked many times. Avoid going deep into details or background of the problem you volunteer to solve. Remember the elevator speech and pitching concept, use it.

RNAtlas is an AI-assisted platform for discovering and designing RNA molecules that can bind to a desired biological target. Given a protein, DNA, or RNA target, RNAtlas combines existing scientific knowledge and computational analysis to identify known RNA binders or propose new candidates when suitable ones are unavailable. It then evaluates these candidates and provides an interactive 3D representation of their interactions with the target. Additionally, by identifying weak regions of an interaction, RNAtlas can further improve the RNA design. Overall, the platform aims to provide an integrated workflow that guides users from a biological target to promising, computationally evaluated RNA-binding candidates.

Supervisor Name and Lastname: *

A. Ercüment Çiçek

Innovation Expert Name and Lastname: *

A. Ercüment Çiçek

The URL of the Project Web Page: *
